OUR CORE VALUES

Inventive: Hacking means more than just writing great code. It means learning, exploring, inventing, investing and educating, all in one.

Inquisitive: Most breakthrough or discoveries throughout history have one thing in common: they're a product of curiosity. This is why we believe in staying curious and hungry.

Unconventional: We love taking a path less travelled, especially when it feeds our business purpose. It is in our DNA of learning and sharing our craft with the rest of the world.

Tenacious: We love having big ideas. But we love it even more when they can be built, tested and launched to the world, making it accessible for all.

Adventurous: We're comfortable in a state of flux. Working with new tech and rapid change requires us to be flexible, adaptable and bold to always taking our work to the next level

SUMMARY

VMware partnered with AngelHack to introduce over 20 developers to VMware Tanzu, fostering innovation and supporting winning hackathon projects through hands-on workshops.

CHALLENGE

- VMware acknowledged the importance of introducing developers to VMware Tanzu, their cloud-native solution, to stay ahead in the fast-evolving tech landscape.

- They aimed to educate on Tanzu's ability to expedite application development and deployment.

SOLUTION

- VMware and AngelHack collaboration featured a workshop and hackathon on Tanzu, providing hands-on learning for over 40 developers to build cloud-native applications.

- The event encouraged real-world application through a creative challenge, with incentives for successful minimum viable product, fostering innovation and experimentation.

IMPACT

- VMware's event with AngelHack increased Tanzu's adoption by over 20 developers. It showcased winning projects, elevating platform awareness.

- The collaboration enhanced VMware's brand recognition, affirming its position as a leader in cloud-native solutions.
